THE BANK OF ENGLAND AND SHIVER. London, 11th September The Times this morning, in an article from special correspondent in whose accuracy it says it has reason to place confidence makes the innortant announcement that the Bank of Engfond's directors have consented to hold one-fifth of the Bank's reserve in silver. The article which is headed, "Remoustrance, says "He the Bank been well advised in falling id with the suggestion pushed forward by certain Americans that it should hold one fifth of this reserve in silver P. Perhips the assent was given in very guarded terms, perhaps, it was done to obligo persons in high quarters; perhaps, it was considerd an act of international courtesy. There may have been this or that reason to exens and extenuate; but the broad plain truth is that in the existing circumstances the Bunk count to have set its face emphatically against an such notion and has not done so. It visalessite contend that the plan is stomped with the permission of the Bank's Charter Act and the anti-ority of Sir Robert Poel. It is equally useless to remember that at the Paris monetary conference in 1881, the Bank, on the surges-Lisbon -3 cases ching & lacqd. ware. For New tion of Ataly and the United States, gave York -10 boxes cassis cil. some sort of a promise that should international bimotallism be established it might. allow the reappearance of silver bullion an asset in the Issue Department of the Bank. The reasons which notusted Sir Robert Feel have no application to the present circumstances. It is important to remember that the concession of ISSL was immediately seized upon as an important British declaration in favour of bimetallism and has been handled as on annoyance against her ever since. We do not live in 1814 and ought to learn wisdom from the experience of 1881. Now a days it would be assless for the Bank of England to keep £7,000,000 or £8,000,000 in the shape of silver resorve as it would be for Parliament to pace a law for the creation of

sent American suggestion? The very point of it is that our reserve is to consist permaneutly. partly of silver so that we may usuat in raising its price so that we could dispose of it at a profit to France. America is to do the very thing ander the proposed schools that under international himetallism we could not do. The circumstances are quite different. Where Peel financial system is the very occasional weak- 5 P.M. ness of our gold reserve at the Bank of England Why should we deliberately choose to water that reserve by practically reducing it one-fifth? Sir Robert Peel's other reason was that a stock of silver might cossionally be convenient for shipment to the far-Plast, but since the telegraph was invented that reason no longer exists. The Times, commenting editorially on what it called "Dramatic Surprises," says the astorishment of the public will be immeasurably greater than at the action of the lucia council. This revolutionary policy, for it is nothing less as our correspondent describes it, applies to the stock of com and bullion held in the Issue Pepartment as security. for Bank notes.

The Pall Mail Gazette stys :- "That some realified promise has been given by the Bank of England authorities to deal with the silver question in a palliative sense is in fact nothing. At present the matter is not regarded seriously, members of the Stock Exchange refusing to balieve it possible that the Bank authorities would countenance a departure which could not but he most damaging to its trade oredit.

Watchmakers to the Admiralty,

The most delicate, important, and valuable part of a watch is the balance, and this has hitherto been unprotected, an emission that allows dirt and damp to affect the movement. In our invention this is overcome without adding to the size, and allows free use of the regulator.
